Only very few people know the real importance and difference between educated and updated and Rohit Sachdev is one of them. Anyone can make you understand things but not everyone can make it relevant for you, but he can. He makes you understand the topic and also connects it to the current scenario which makes learning interesting not only that he also is very inquisitive which is his strongest suit and us as students couldn't ask for more. He is very dedicated towards teaching and clears your doubt with proper discussion. Moreover he is a trainer with great knowledge, amicable which makes it easy for you to clear your doubts and excellent communication skills.

Excited to know who will be your Trainer throughout the journey?

Hi!

I am **Rohit Sachdev**

I am a corporate professional turned trainer for the love of teaching. My expertise currently ranges from teaching CFA & FRM certifications. As a faculty I believe in teaching the concepts in depth and focus on knowledge, rather than merely passing an examination. Being a trainer, my focus is on concepts and detailed learning, where marks are a mere by-product of the knowledge acquired. Owing to my exposure to Engineering and Finance & having my share of experience in transitioning between the two, I provide career counselling for students confused for the next step in their career by helping them identify their interests.

On a personal front I am working towards a mission of providing quality education in the field of finance directly relevant & applicable to industry standards. I have previously worked at Morningstar & Deutsche Bank(IB) in valuation roles.

I have been a former visiting faculty at Edupristine, a leading Pan India institute for various finance courses.

At Positive Alpha it's not just about delivering an x hours of lectures and getting done with syllabus, but breaking down on every concept and practical excel demonstrations to teach conceptually. We believe, Learning is the focus & Marks are a by product. Positive Alpha strives to train students in a way that they are ready to enter the corporate world with finance knowledge and practical insights to apply the same in their day to day activities.

Don't just take our word for it.

Rohit Sachdev is a fantastic trainer with ample knowledge in the field of finance and investment banking. His way of teaching is methodical and you get to learn more than there is to be taught in the syllabus. Because of his young age, the students are able to connect and relate better to the subject matter based on his articulation of the topics. He would personally help his students, incl me whenever we needed it. Thanks to Rohit, I've had the opportunity to learn more than I could have at any other institute.
